6 AC Power Strip

How to install

Requires a cut out in the work surface in order to sit flush.

Step 1: Mark the area according to the 4 holes cut out as shown on the diagram, ensuring you have a power outlet nearby. Make sure the surface is clean and dry.

Step 2: Drill holes of diameter 0.19 inches where marked.

Step 3: Secure power strip in place with 4 screws.

Clip the metal plate cover onto the socket.

UL certificate: Complies with UL/CUL Certification, UL 962A furniture power distribution units.
