PS60BK
POWER CENTER

How to install

Requires a cut out in the work surface in order to sit flush.

- Step 1:** Mark the area according to the 4 holes cut out as shown on the diagram, ensuring you have a power outlet nearby. Make sure the surface is clean and dry.
- Step 2:** Drill holes of diameter 0.19 inches where marked.
- Step 3:** Secure power strip in place with 4 screws.
